## THE POWER OF THOUGHT

Man is made to the image and likeness of God. How do we find and experience this image? The discovery of this Divine image in us, [observe the good in our fellow man] can be initiated by observing the patterns and forms of nature. Man is given the power of creative thinking. To think and bring this thought process into a viable form is a precious gift, of the love of God. To develop this faculty we must let the child in us operate, free of time and space. We commonly speak of this as our imagination. It is true. It is our imagination, but in removing yourself from this limitation of time and space we move into the infinite. We bring down into our being a touch of the Divine Mind. This is brought into being by seeing with the minds eye.

A notebook starts the translating of this information into a logical systematic program of reducton to physical form and practice. Ideas come as a burst of light. We reach out, grasp and learn not to be fearful that ideas will be lost. No idea is ever lost if we are patient and loving to ourselves. The real test of our being is the ability to work in time, in a rational systematic way, with an idea that we have been given. Self discipline is required in the development of your skill inventory. These skills will be required to translate each idea into a final product.

In 1960, I saw Dr. Wilhelm Sturmer working at a microscope in his home. He was making pretty pictures of liquid crystal materials, which he had treated and allowed to cool under the microscope. As I observed the activity of these liquid crystal materials, an idea flashed in front of my mind. These would be excellent products to be turned into liquid crystal displays for watches, flat panel television screens, and other visual devices. When I returned to I.B.M. I set myself the task to bring this idea into being. First by buying a microscope and training myself to use it. Then by buying and synthesizing the liquid crystals and determining their purity. Finally the evolution of the methodology of making these into viable and practical displays. This was in 1962, years ahead of time.

I now have at Psychic Research this microscope with the ancenary equipment. It is being applied to an even more exciting concept. The observing, measuring and quantifying the bio-energetic fields that exist both in and around a living cell.

We charge our body with breath, we structure our subtle body with a chargeless energetic mass, prana. With these two energies we have the essential set of forces necessary for the creation of a thought form. We hold a crystal in our hand, draw in our breath and focus our mind into the crystal and suddenly release the breath through the nostrils with intention to link. A charge transfer takes place. We occupy the space between the lattice system of the quartz crystal. This charge is

equivalent to the charging of a storage battery with electricity. It can now be observed and measured by the Omega 4 Metatronic machine. When we speak of the power of thought, it is true. Thought moves through a field we call etheric space. We must consider matter which has form, that physical object, is now contained by time and space. But, in that matter is a spaceless dimension the inter atomic spacing. As we can move an electron from its orbital shell, by impinging on a crystal with a photon of radiation which that crystal will absorb, we cause that electron to shift to its orbital rotation and come back to a ground state. It emits a photon of light we call luminescence. The energy of the mind focused in space has the capacity to expand the lattice system in which it is projected and release with intention. The beauty of this concept, and activity, is that this information is locked in and stored within the crystal in much the same manner as one stores a magnetic domain on ferromagnetic surfaces, ie. recording tape or magnetic recording discs. In this way you can focus your intention on the crystal, you can then extract the data, amplify the pulse or release it as a projected burst of etheric plasma. This set of statements is the key, the heart, of the evolving technology of the use of crystals and crystal devices in Transformational Healing. With these devices we can move directly into the pattern of thought, the locked emotions, and the incomplete thought forms. Then release them, so that the subject we are working with can bring their body into a state of wholeness and well being. The resonant fundamental vibration of the crystal is cut and tuned to the vibrational activity of water. Consequently, when we build a field in the crystal with intention and thought, we have the fundamental carrier wave present in the crystal to transfer the information directly into the body of an individual, via the structuring of the water and its salts.

For the past year we have studied the structuring of water and the resonant transfer of a charged crystal into water passed around a crystal. By careful experimentation we have noted the same vibration in the crystal transferred to the water itself. This change lasts for many months and as far as we know at this time is a permanent change. What we have found is that both the vibration in the water and in the crystal can be erased by a bulk eraser for magnetic tape or by a focused thought and the pulling in of breath and the sudden release of breath. In doing therapeutic work with the crystals we must be cognizant that we are providing a field (loving) which field if we have a moment of doubt and indecision can be nullified by the act of thought. and all effects come to a halt. It is the operators belief in himself, the knowledge and assurance of what he is doing that beings about this form of therapy. The subject must accept responsibility for their life and assume the pattern of living that this form of treatment brings about. The subject is healing himself, the operator is providing a loving service to enable the recipient to bring himself back to a state of balance and well being.

In attendance were 72 people for the weekend, and 52 people for the week long seminar. On wednesday we had a suprise visit from Dr. Trager. He participated in working with the crystals on a young woman who had undergone severe damage to her body in an automobile accident. From the work that was completed, the body straightend out and she was able to walk and function in a normal manner. Demonstrations were given of the new Omega 4 machine and experiments were done in group healing, modification of the genetic codes on distorted chromosome pairs of a young child, and therapeutic analysis of the bio-energetic fields before and after treatment. The application of this new instrument in measuring the vibration of the Bach Flower remedies were demonstrated and the application of these vibrations into pure water were demonstrated. To use these crystals in therapeutic transformational healing one must work without fear, and in a loving manner. This was stressed again and again. You cannot learn from observation but must become involved and work frequently with these crystals. The sessions were all video and audio taped professionally. Edited versions of this seminar will soon be available for sale. Lectures were given by Dr. Leonard Laskow, Dr. Rozanne Bazinet, Carol and Warren Klausner. The food was excellent and everyone left with a deep sense of joy and fulfilment.

#### ONE FAMILY'S EXPERIENCE WITH CRYSTALS

Jan and Alan Kristal: "We have been using crystals in our family since they were introduced to us by Marcel two years ago. As we became more familiar with using them, my husband Alan and I began using crystals on one another and on our children Vanessa, 5 and Nicole, 8. We started by charging water with a crystal and found the taste to be wonderful. One day when Vanessa was making her own glass of "crystal water" she put so much energy into the water that the glass actually exploded, sending glass in all directions. This incident showed us the potential energy that is possible when using a crystal." They go on to say that Nicole was skeptical until she visited P.R.I., and Marcel showed the children how to bend spoons. "When anyone is hurt or sick we take out the healing crystal." Cuts, scrapes, bad dreams, headaches and bad feelings are among the things for which the children use the crystal. They work on themselves, and remind their parents, if they forget.

#### DR. ADAMS HAS SENT US A TREATMENT RECORD

Among the many case records, it is obvious that any clear understanding of "success" using the crystal is very difficult. When you may have been most successful, or totally unsuccessful, you may never see the patients again. #176 Bone fractures: 3 cases of fracture, metacarpals, injury energy removed, pain decreased rapidly, excellent callus formation. Energy field harmonious. #177 Wrist flexor tendonitis: symptomatic for 3 weeks, on anti-inflammatories, pain erased after one treatment with crystal. #178 Puncture wound to right foot, with edema, painful gait: injury energy removed. Patient awoke the following morning, no swelling or pain, rapid wound healing...Please healees, let your healers know!!

## EXPERIMENT #17 THE USE OF CRYSTAL MEDITATION IN CREATIVE VISUALIZATION

When one reads a book one is translating words into images and is linking with these images through the creative mind. We and the words created by the author become one. A well written book brings into our mind the image of the character and we then experience what the author has visualized, through our experience. In place of the induced visualization in our minds eye of our reading it is even more exciting to move in space and visualize through the crystal a terrain, a country, or a time past. We have this capacity.

Locate an object that is ancient. For example a bit of stone from the pyramid of Cheops, or a fragment from Mexico's monuments, or even an old heirloom ring. Charge the meditation crystal with breath, then draw your breath in and become one with the crystal with the exhalation of breath. Then place the crystal over the object you wish to link into and become one. Close your eyes and have a tape recorder beside you. Draw your breath in, slowly release the breath through the nostrils into the crystal, and down into the object. Breathe in and out quietly. Then speak what ever comes to you. Do not try to wait for images to appear. Speak in a free, open way. As the voice begins, images will appear to the minds eye and then you can question. Open up the imagery so that you can move, if you are on an island move into the jungle or to the sea shore. As you do this the awareness becomes stronger and stronger, that you are truly there. You are experiencing reality. Do this alone at first, then do it with a friend. When you amplify this free field with a loving friend it becomes a most glorious and wonderful experience in inner space travel. Transcribe your experiences and send them to us. We will publish them in time.

## EXPERIMENT #16 CREATING INVENTIONS WITH THE HELP OF THE CRYSTAL

The crystal is a focusing device the same as the lens of a camera is a focusing device to bring into an image the rays of light that are in the area surrounding the lens of a camera. So to, the meditation crystal is a simple lensing system to bring the patterns of thought into focus and precipitate the energies into a thought form. This image can be seen clearly with the minds eye and a description of what is being seen can be verbalized or drawn. Time and space do not exist and when you look at this object created in the crystal meditation device or a quartz crystal ball. You then initiate time with the start of your thinking. Write out what you see, you sequence time and precipitate this pattern of thought more and more into a state of objective reality. When an idea occurs take the crystal in you left hand, after charging, project the image of the idea you have into the crystal and then start writing the information that is coming to you. The idea exists in an etheric space in front of your body. As you precipitate this into a form that accepts it, that energy is more highly consolidated and more easily accessed by the human mind. This can be applied to decision making in business, interpersonal relationships, and above all getting to know yourself better. Try this out and let us know of your progress.

HEALING AND MEDITATION CRYSTALS

The cut Crystals available through Pyschic Research are as follows:

<u>Order #</u>	<u>Crystal</u>	<u>PRICE</u>
MC4	MEDITATION - 4 SIDED . . . . .	\$150.00
MC6	MEDITATION - 6 SIDED . . . . .	\$250.00
HC4	HEALING - 4 SIDED . . . . .	\$400.00
HC6	HEALING - 6 SIDED . . . . .	\$500.00
HC8	HEALING - 8 SIDED . . . . .	\$600.00

- U.S., Canada and Mexico add postage and handling of \$5.00 for 1 Crystal, plus \$2.50 for each additional Crystal ordered. Other countries add \$10.00 to ship SURFACE, add \$20.00 to ship AIR.
- California residents add 7% sales tax.

When you order a crystal, complete the Order Form indicating type of crystal, what it will be used for, and enclose a check or money order for the cost. Love and care are put into the cutting of the crystals. The quality quartz crystal that we use is becoming more difficult to locate because of increased demand. Expect 4 to 6 weeks delivery under normal circumstances and 6 to 12 weeks delivery when raw crystal is on back order.

We would like you to consider and appreciate the value of the crystal you are ordering and make use of it in your life with love. You might want to attend one of Marcel's workshops on the use of crystals or if this is not possible, there will be a video cassette course available in November. With your crystal order you will receive an audio cassette tape that gives instructions on how to use the crystal.

If you break the tip of your crystal, we can retune (recut) it for you. The cost would depend on the extent of damage to be repaired. (\$25.00 to \$100.00)

SCIENTIFIC PAPERS

"Cellular Regeneration" and "Structured Water: It's Healing Effects on the Diseased State" are two research proposals, written by Norman D. Mikesell, M.S., for researchers in the field of metabolic and degenerative diseases. The purpose of these papers is to inspire researchers to design experiments using structured water, vitamins and minerals. Although the literature review includes both experimental and clinical data, it is in no way intended as a set of recommendations for the practicing physician or healer. The price of "Cellular Regeneration" is \$30.00 and the Order # is SP-100. The "Structured Water" paper is still in preparation.

"The Effects of Wearing a Quartz Crystal on Measures of Stress Tolerance in Individuals" is written by Dr. Rozanne Bazinet. The price is \$30.00 and the Order # is SP-200.

- U.S., Canada and Mexico add 10% to order for postage and handling, other countries add 20%.
- California residents add 7% sales tax.

## PRACTITIONERS AND NURSES CREDIT COURSE ON CRYSTAL HEALING

Introduction to the Joy of Living and The Introduction to Crystals and Crystal Healing is approved for nursing credit in the states of Nevada and California. The courses are transferable throughout the U.S. because Nevada is an American Nursing Association approved state. These courses will enable the practitioner to identify and reduce stress in life situations. They will be offered in 1986 at Joy Lake. Contact Alan Morvay, P.O. ## LABORATORY RESULTS

Research with University of Calif at Davis - These last two months of August and September were devoted to working out the details of protocol, integration of the data in the computer and the systematizing of the results into graphical form. The primary experiment was the creation of the essence of epinephrine in water. Then the study of the effect on the body of the subject drinking this water vs. a control sample of water. The data is in our hands now for study and analysis. Dr. Smith requested that we not take videotapes of the sessions, we sadly acquiesced. In the next newsletter we will publish some of the first graphs of the results of what is being accomplished at U.C. Davis.

Structuring of water - We now have quartz cuvetts. We are checking the water experimentation that we have done with the plastic cuvetts. In the wave length region 400-200 nanometers in the ultra violet the plastic cuvetts seem to have given adequate results. However below 200 nanometers a new series of absorption bands are noted with the quartz which we are exploring at this moment. The following experiments have been completed. Distilled water, reverse osmosis water, reverse osmosis water with silica and reverse osmosis water with quartz dust. The most powerful effect was with quartz dust. The structuring is evident in the samples after one month of experimentation. We are now in the process of re-doing the samples with a greater attention to the timing, temperature control and the handling of the samples.

Sound experiments - The effect of sound in structuring water is being investigated. The most dramatic result to date is the influence of the sounds of drums in modifying the absorption pattern of water, in the ultra violet range between 400 and 200 nanometers. We are now exploring the effect of ethnic drum sounds. Namely, the African drums, the Tibetan drums and the sounds of Gene Kruppa. The next area of exploration with sound are the flute and then the organ.

Wine experiments- We have made a systematic study of five Chardonnay wines. These are: Rutherford Hill-Napa Valley 1982, Leeward-Santa Maria Valley 1982, Lolonis-Mendocino 1982, Chateau St. Jean-Alexander Valley 1981, Joseph Phillips-Sonoma 1981. The results show that all of the wines selected vary in taste and bouquet with the control sample. The Rutherford sample showed the greatest change in pH from 3.28 for the control against 3.18 for the 20x. The dielectric conductivity went from .187 to .195. A final report on these experiments is in preparation at this time.

## THE SYNERGY OF A BRAIN-MIND BALANCE

The moment you start separating any part of the human anatomy, an incomplete understanding is had of that organ. It is especially true of the human brain, in the physiological consideration of the activity of the left and the right hemispheres. Scientific and logical thinking is said to go on in the left hemisphere. The right hemisphere handles imaginative and creative aspects of the mind. The complete person is one in whom the mind functions with both of these activities in a cooperative, simultaneous manner. This is what love gives to man and woman, the unifying cohesion of two opposites which when brought together lovingly, bring a totalitaly and balance into being. To love

being. To love one's self is to eliminate criticism. In the place of criticism, observe what has been learned from this experience. There is an absolute dicotomy between the two halves of the brain. One is working with the activity of the senses, and is conscious of time and space. The other brain operates in the now and sees no time or spatial limitations.

#### THINGS TO PONDER

I found myself giving away yet another copy of Jerry Jampolskys' book, LOVE IS LETTING GO OF FEAR. Many of my friends and acquaintances seem to have the same problems. I realized the friends who needed help were:

1. not in love with themselves
2. very judgemental, not very discerning
3. were victims or vanquishers
4. expected others to behave in some manner that they felt was "right"
5. were unable to let go not only of fear, but of most things that encumber them.

The simple truth is that life is a free will process of letting go, and if possible following Gods' plan.

A young lady who comes to me for counseling from time to time, as she travels through her layers of the onion of life, gave me this definition. Letting go and letting God - Most people run into all the trees all the time, some of the people have learned to walk around the trees most of the time and a few are able to let go and let God. These people, when they are properly prepared to truely release, cease willing things happen for them. They are able to define a problem and truely mean, "Thy will be done". These people usually find themselves far ahead of their expectations, doing what they are here to do, and loving life.

The ability to love life is directly related to loving ourselves. The ability to love ourselves is a result of letting go of collected expectations. We feel we must be, or do, what we have programed ourselves, or been programed to expect. Where the program comes from is not important, unless it is necessary for you to understand and focus on it, in order to manifest a release.

Without self love we are not able to love others, or God, with a whole being. As long as we are in these bodies, these filters of our true selves, we must strive to be clear on all levels. Each time a new layer of trial or tribulation is to be broached, do it with love and the child like enthusiasm for an adventure. If Gods' love is the glue that holds matter and energy together, then make sure you adhere to those things that are love and bypass those actions that are destructive to love. i.e. hatred, anger, vengeance, jealousy, etc.
